

Dr. Kapil Mohan holds a Master of Technology (M.Tech.) in Applied Geophysics and a Ph.D. in Applied Geophysics (Seismology) from Kurukshetra University, Kurukshetra. He has more than 16 years of experience in Seismological Research and an industrial experience of 03 years. His research focuses on strong-motion simulation, seismic hazard assessment (both at macro and site-specific levels) and seismic microzonaton. He has also conducted research work in Magnetotellurics for characterization of fault lines, sediment thickness mapping and geothermal source delineation in the Gujarat region. Presently, he is working in operational seismology and also contributing to technical and administrative matters related to the National Center for Seismology (NCS) office complex coming up at Noida.
